

Noodlehead Range Backpack Workshop

We will be making this fun backpack and I will show you different modifications you can do to make it truly your own.

Please contact me if you have any questions about the pattern or supply list before the workshop. You will need to purchase your own copy of the pattern and bring it to the workshop.

Noodlehead Range Backpack Workshop

Supplies Needed:

- * Exterior Fabric - 3/4 yard (1/2 yard if using 54" fabric) - I recommend using a canvas (or thicker than quilting cotton) fabric for your exterior. It really gives your body more shape.**
- * Contrast Bottom Fabric (you can also use cork, leather, vinyl, waxed canvas) - You will need a piece that is 13" tall x 16" wide.**
- * Lining Fabric - 1.5 yards - I used two different prints on my backpack as I did my lining with one fabric and the straps and exterior closures with another fabric (I used a canvas fabric for my straps and closures). If you do this you will need 1 yard for lining and 1/2 yard for straps and exterior closures.**
- * Fusible Woven Interfacing (Pellon SF101 - 20" wide) 3.5 yards**
- * Medium Weight Fusible Interfacing (Pellon 809) 1 yard if 44" wide, 2 yards if 20" wide**
- * (2 each) 1.5" wide rectangle rings and (2 each) 1.5" wide strap sliders - you can find these on Etsy in a variety of finishes.**
- * (2 each) 1" wide D-rings for closure (you can also use one d-ring and one 1" swivel clasp instead of 2 d-rings - I'll show you how to modify your closure for this). I buy my hardware at PurseSuppliesRUs on Etsy.**
- * One 8" zipper for front pocket (I buy zippers at Zip It Zippers on Etsy)**
- * One 9" length of 1" wide cotton webbing or leather for hang tag (can also be made out of fabric which I can demonstrate).**

- ** If you are using quilting cotton as your exterior fabric you will also need a 1/2 yard of 6-9oz. weight 44" wide duck canvas to help stabilize your bag. ****

Additional supplies: Thread to match your fabric, cutting mat, ruler, rotary cutter, pins or clover clips, size 14 needles, water-soluble pen or hera marker
